

Implementing a Newsroom Portfolio Website in AEM

Configure the Header Using the OOTB Header Component

1. Go to **AEM** → **Sites** → **WKND** (or your project folder).
2. Open the **Editable Template** used for all pages.
3. In the **Header Section**, add the **OOTB Header Component**.
4. Set up the menu with the following options:
 - **Home**
 - **News** (Dropdown with five news articles)
 - **About Me**
 - **Contact Me**
5. Apply custom styles using the **ui.frontend** folder.

Build the Footer with Four Sections

1. Navigate to **AEM** → **Experience Fragments**.
2. Create a new **Footer XF** with these sections:
 - **About Me** – Use a **Text Component** to introduce the journalist.
 - **Contact Me** – Add a **Text or Teaser Component** with an email and phone number.
 - **Latest News** – Use a **List Component** to display five recent news articles (links open in a new tab).
 - **Social Media** – Include a **List Component** with social media links.
3. Save and publish the **Footer XF**.

Develop the Home Page Using a Content Page Template

1. Go to **Sites** → **Create Page** → **Content Page Template**.
2. Name it **Home Page** and open the editor.

3. Add a **Teaser Component** to feature an **Award Ceremony**, including:
 - **Image**: Upload an award-related image.
 - **Title**: Display the award name.
 - **Description**: Provide award details.
 - **CTA (Call to Action)**: Link to the full award article.
4. Save and publish the page.

Create a News Page with a Custom Newsroom Component

1. Navigate to **Sites** → **Create Page** → **Newsroom Template**.
2. Name the page **News Page** and open the editor.
3. Add a **Custom Newsroom Component**, setting the parent path to **/content/news**.
4. Configure it to display news articles as cards containing:
 - **Title**
 - **News Detail**
 - **Image**
5. Ensure each article has a unique title, description, and image.

Develop News Articles Under /content/news

1. Go to **Sites** → **Create Page** → **News Article Template**.
2. Create **five unique news articles** under **/content/news**.
3. Populate each article with:
 - **Title**
 - **Image**
 - **Text Component** for the description
4. Ensure the **Newsroom Component** can retrieve these articles.

Create the "About Me" Page with a Journalist Component

1. Navigate to **Sites** → **Create Page** → **Content Page Template**.
2. Name it **About Me** and open the editor.
3. Drag the **Journalist Component** and configure:
 - **Name**
 - **Biography and Achievements**
 - **Profile Image**
 - **Social Media Links**
4. Save and publish the page.

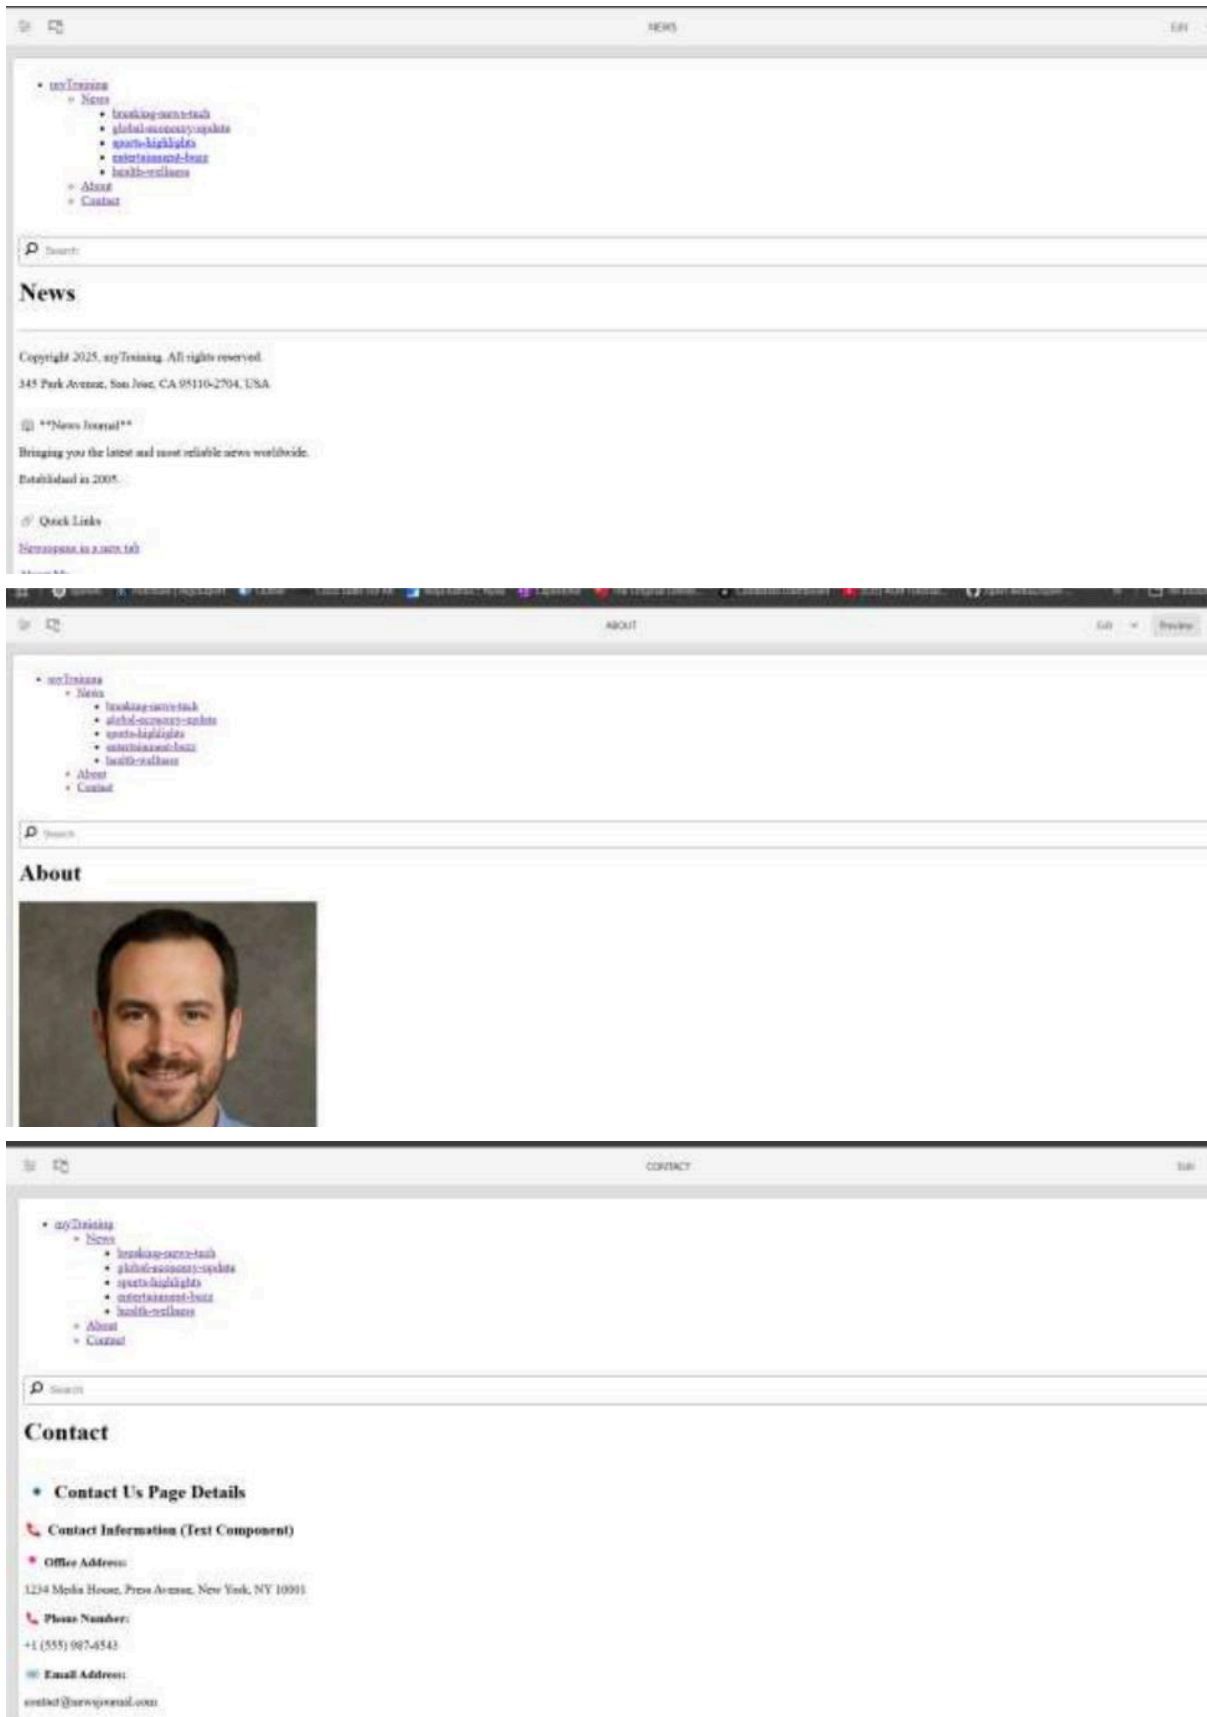

Build the "Contact Me" Page Using Text/Teaser Components

1. Navigate to **Sites** → **Create Page** → **Content Page Template**.
2. Name it **Contact Me** and open the editor.
3. Add **Text or Teaser Components** for:
 - **Email Address**
 - **Phone Number**
 - **Office Address**
 - **Social Media Links**
4. Save and publish the page.

Integrate the Header and Footer at the Template Level

1. Go to **AEM** → **Templates** and open the **Newsroom Template**.
2. In the **Structure Layer**, insert the **Header and Footer XF**.
3. Save the template and apply it to all pages.
